HIGH-TECH FORWARD ROWING SYSTEM FOR BEGINNERS & PROFESSIONALS
With RowVista®, the innovative system for effortless feathering and squaring, you row in the direction you are facing and avoid boat damage and rowing accidents.

CLASSIC REVERSE ROWING WITH SLIDING SEAT FOR THE XCAT
Rowing in reverse in the way it has been done for hundreds of years. A catamaran provides remarkable stability, delivering an enhanced level of safety.

RowVista® enables efficient, precise, and safe forward rowing thanks to its unique mechanical design. How it works:

1. Rigid seesaw
2. High-strength connecting rods with ball head
3. Stop cam ensures the optimum blade pitch
4. Smooth-running ball bearings for effortless feathering, squaring and rowing
5. Carbon fiber handle and rudder blade tube from one mold
6. Release leash for folding in the oars
7. Rigid pivot rowlock

HIGH-TECH FORWARD ROWING-SYSTEM

Rowing to adventure

MOBILITY

Simply XCAT transportation. Just a few roof rack accessories, and you can effortlessly and safely transport your XCAT on your car.

ELECTRIC DRIVE FOR THE XCAT

The eProp outboard is ready for use in a flash and fits on every XCAT model. The lightweight motor impresses with its slim design, featuring collision protection and a stable mounting for the battery and remote control on the center bar.

- Full throttle: approx. range 8 km
approx. travel time 70 minutes
- Half throttle: approx. range 20 km
approx. travel time 5 hours
- Weight motor + battery: 5.2 kg (11 lbs)
